CAREER SUMMARY

Aspiring IT Support professional with expertise in diagnosing technical issues and delivering exceptional customer service. Directed maintenance of complex telecommunications systems and managed troubleshooting for electronic devices, ensuring operational efficiency. Skilled in programming and installing security systems to enhance safety measures. Eager to leverage hands-on experience in a collaborative IT environment, contributing to seamless user support and system reliability.

EDUCATION AND CERTIFICATION

Bachelor's in Data/Cybersecurity University of Arizona Global	Present
Pre Security Certification TryHackMe	2026
Foundation of Cybersecurity Google Coursera	2026

TECHNICAL SKILLS

Network Fundamentals | Problem Solving | Microsoft Office | Spreadsheets | Project Management

WORK EXPERIENCE

Interior Communication Electrician | US Navy 2013- 2019

Oversaw electrical safety, maintenance, and operational readiness of critical alarm, sensor, and environmental monitoring systems. Directed a team of 5 technicians in testing, calibrating, and troubleshooting specialized sensor and telemetry equipment. Maintained enterprise Avaya telecommunications systems, ensuring preventive and corrective maintenance for over 5,000 analog/digital terminals and multiple network components.

- Supervised precision testing and diagnostics of sensor equipment.
- Led maintenance efforts for 6 MDF cross-connect fields and 9 Expansion Port Networks.
- Ensured operational continuity of 3 media servers and maintenance terminals.

Fire Alarm Technician | Trittek 2019- Present

Executed hands-on technical and mechanical tasks with electronic devices, including desktops and handhelds. Delivered in-field customer service, ensuring user satisfaction with safety and visual assessments. Programmed and installed various alarm monitors, such as fire, security, and digital communicators. Managed entry installations efficiently.

- Maintained high standards of customer service during on-site visits.
- Configured networked alarm systems to enhance security measures.
- Assisted in troubleshooting technical issues with electronic devices.
